

## PSP 2.1 - PIP

<b>Problem Description</b> (Briefly describe the problems encountered)
<ul style="list-style-type: none"><li>- The main issue here was the improper time management, because even if all phases were finished, most of the work was executed after the soft deadline.</li><li>- The requirements and the math work involved in this assignment was not fully understood and depicted in the high level design, however the coding work had many rework to correct the proper math functions.</li></ul>
<b>Proposal Description</b> (Briefly describe the process improvements that you propose)
<ul style="list-style-type: none"><li>- The activities of the assignments must be started as soon as the assignment is delivered, to avoid late submissions.</li><li>- It is needed to do (if not documented) "on sheet" examples for math functions to be sure that expected results and procedures are coded</li></ul>
<b>Other Notes and Comments</b> (Note any other comments or observations that describe your experiences or improvement ideas)
<ul style="list-style-type: none"><li>- No additional comments</li></ul>
